Guardian™
Pipeline Washer

The *Guardian™ Pipeline Washer* economically combines flexibility and security to automatically and efficiently clean your milking system after each shift.

The *Guardian™* first dispenses the proper amount of cleaning chemicals into the wash solution and then controls the circulation through the clean-in-place milking system.

- Programmable electronic control to provide a customized wash cycle;

- Digital display shows cycle status and assists in programming;

- Stainless steel enclosures;

- Peristaltic chemical pumps mounted in separate enclosure for reduced chemical handling;

- Accurately dispenses chemicals up to 7 oz (200 ml) per minute;

- Ability to utilize concentrated chemicals;

- Three automatic sanitize start times;

- Access code for security;

- Displays English, French, German, Italian, Spanish or Slovene;

- Replaceable PROM software for future product enhancements;

- UL, CSA and CE rated.

Advanced Features:

- Air injector output;

- Chemical refill alert;

- Ability to be the 'Master Control' for the system in milk mode;

- Separation valve control to direct solution to a specific holding tank with optional separation valve.

Look to the *Guardian™ Pipeline Washer* for convenience, consistency, efficiency and accuracy to help make clean-up complete.
